

One of Bodytree UK's aims is to support the work of Bodytree India. As an alternative to financial support we are looking at ways to provide basic equipment that would help Bodytree India tremendously to achieve their potential in very simple ways. Any help that you may be able to give in acquiring any of the following equipment or in donations towards specific items would be greatly appreciated.

Bodytree India's centre is in a remote rainforest area and a second-hand 4-wheel drive vehicle would help to transport of people coming for care and essential supplies. It would enable travel to different parts of the country to run workshops and teach techniques for treating people from different climatic zones. A film projector would enable the project to show students and Villagers health education work and demonstrations, and to visualise examples of indigenous practices from around the world.

Below is a list of the things needed for the Indian health education programme. Any help would let more people understand and gain the skills and knowledge that we feel everyone is entitled to. Thank you.

Second-hand 4-wheel drive vehicle	£2000
Solar Panels for electricity	£1500
Solar water heater	£400
Laptop Computer	£600
Digital camcorder plus film	£500
Projector	£800
Mobile Projector Screen	£200
Laminator and accessories (to preserve teaching materials)	£60
5 tape recorders for students to carry out interviews	£200
Music Player with speakers (for the theatre group)	£150
Film editing software (so that we can make our own films)	£100

If anyone could also donate time to teach us to use editing software, and/or editing space/time it would really be appreciated

Cheques can be made payable to Bodytree UK Ltd, donations of specific items can be sent to Bodytree UK, c/o Brady Centre, 192-196 Hanbury Street, London E1 5HU.
